

Practical / tabletop task

Identify the feline parts

Ambassador notes

This task could be incorporated with a talk or session on a cat-related topic.

The difficulty of the terms used should be tailored to the age-group of the audience, and you can take out any more difficult terms and add simpler ones depending on your needs.

You can expand upon and discuss the terms as you work through this task.

Ask questions and invite discussion - get them to identify the same area of anatomy on their bodies, ask how they might be different on different breeds of cat for example - to make the task more memorable.

Practical / tabletop task

Identify the feline parts
